

Linear Art Project

I'm drawing a fairly easy drawing today. I guess I don't really have an actual reason for drawing it. Now I'm going to how to recreate my design for the 10 lines

- 1- You need to put a line on $y = -2/3x + 14$
- 2- You need to put a line on $y = -1/2x + 9$
- 3- You need to put a line on $y = -2/3x + 3$
- 4- You need to put a line on $y = -3/5x - 7$
- 5- You need to put a line on $y = -1/2x - 13$
- 6- You need to put a line on $y = 3/2x + 16$
- 7- You need to put a line on $y = 2x - 4$
- 8- You need to put a line on $y = 3x - 12$
- 9- You need to put a line on $y = 2/3x - 17$
- 10- You need to put a line on $y = 4x - 9$
